BY

PEAK POWER SOLUTIONS

End-to-End Battery Development

No-cost battery solution through a proven battery development process. Shared savings aligns incentives to your objectives.

Battery Software & Operation

Battery operation and prediction software paired with energy markets expertise maximizes the value of existing battery storage.

Grid Event Forecasting & Notifications

No battery? No problem. Optimize energy management and cut energy costs with *GridPredict*. >90% accuracy.

PROVEN RESULTS WITH PEAK POWER

Running a facility is tough. You're juggling rising energy costs, market uncertainty, deferred maintenance, unexpected repairs, and sustainability goals—all while keeping operations running smoothly. You need solutions that address these challenges without adding operational complexity.

That's where Peak Power comes in. We simplify energy management for large energy users. Our end-to-end battery storage solutions help customers monetize energy flexibility and pursue sustainability goals. The battery is managed seamlessly in the background so there is no impact on day-to-day operations.

The result? *Lower operating expenses, increased revenue opportunities, smoother operations, and improved sustainability outcomes.*

With **~986 MWh of contracted energy capacity**, we've unlocked over **\$30 million in value** for customers through our solutions. Let us help you turn energy challenges into opportunities.

"This was a truly collaborative partnership between Lactalis Canada, our project plants, and Peak Power and SWITCH Power with respect to site coordination, planning and installation."

RICH DANIELS

Strategic Purchasing Manager, CAPEX, North America

Lactalis Canada

Energy markets are complex. We make them simple.

Our team of energy experts can help you understand the financial and environmental value of a project and help you evaluate a zero CAPEX solution to install energy storage at your facility.

READY TO EMPOWER YOUR BUSINESS WITH CLEAN ENERGY SOLUTIONS?

Partner with ENDVR Energy, your Peak Power contact in the Milton area!

ENDVR Energy, a subsidiary of Milton Hydro Holdings Inc., delivers innovative, end-to-end energy solutions designed to help commercial and industrial customers improve efficiency, reduce costs, and achieve sustainability goals.

We provide turnkey expertise in design, engineering, construction, installation, inspections, and field services - supporting local distribution companies and businesses as they modernize infrastructure and gain a competitive edge.

From smart metering and EV charging to onsite clean energy generation and storage and grid upgrades, our solutions are built for scalability, reliability, and long-term performance. With a strong track record in delivering complex energy projects and working with trusted vendors like Peak Power, our collaborative approach ensures every customer benefits from optimized operations, reduced energy risks, and measurable ROI.

At ENDVR Energy, we don't just power facilities - we help power the future of your business.
