

THIRD-PARTY PERMIT REVIEW FOR ONTARIO LDC'S

WHAT WE DELIVER

Technical Permit Reviews

Standardized, defensible engineering review for all attachment types.

Our Reviews Include:

- Site & field verification (as needed)
- Engineering analysis & technical comments
- Marked-up construction drawings
- Make-ready identification & coordination
- Clear permit disposition & documentation

Flexible Review Depth

Review depth scales from regulatory minimum to full field verification - tailored to your risk profile

Outputs integrate directly into your workflows & systems.

Program Development

We Design Policies, Workflows, & Standards Aligned With:

- Ontario Reg. 22/04
- ESA Guidelines
- CSA C22.3 No. 1
- Your LDC's internal standards

Permit Process Reviews

ENDVR Energy handles day-to-day permit flow so your team stays focused on operations.

We Manage:

- Application intake & screening (clean vs. exception lane)
- Applicant communication & revision tracking
- Approvals & fee administration

Programs can be structured to recover costs & maintain predictable timelines.

Construction Verification (CVP)

Close-out you can trust.

We Provide:

- Field inspections (sampling, targeted, or full)
- As-built processing & compliance reporting
- Certificate recording & permit closure
