

CONSTRUCTION VERIFICATION PROGRAM INSPECTION SERVICES (CVP)

CVP INSPECTION SERVICES

**Compliance before energization,
without the bottleneck.**

Ontario Regulation 22/04 requires every distribution build to be inspected and approved before it goes live.

For many LDCs that is a bottleneck: crews pulled off core work and energizations stalled behind inspection backlogs.

ENDVR Energy handles it end to end, freeing up your workforce and ensuring timely verification. You get confidence in every build, before energization.

WHAT'S INCLUDED

QUALIFIED INSPECTORS

Inspector qualification and coordination, approved before mobilization.

VERIFIED TO STANDARD

Verification against approved work drawings, instructions, and standards.

FIELD INSPECTION

Field inspection of overhead and underground line construction.

CERTIFICATES ISSUED

Records of inspection and certificates issued per CVP.

PROGRESSIVE INSPECTION

Progressive inspection, including pre-backfill verification underground.

COMPLIANCE RECORDS

Deficiency documentation, closeout, and organized compliance records.

FIND A DEFICIENCY?

We document it, coordinate the fix at your direction, and certify only once the inspector confirms compliance.

YOUR SYSTEM. YOUR STANDARDS. YOUR SIGN-OFF.

Your approved CVP, run on your terms.

WE DO THE LEG-WORK

Frees your workforce so energizations stay on schedule.
